

# Deplin<sup>®</sup> capsules are now free from dyes

***Same formulation, now in a clear capsule***

Capsules enlarged for illustration purpose

**For patients who are taking DEPLIN 7.5mg capsules, these capsules will also now be in clear capsules.**

**As we transition, you will either receive orange capsules or clear capsules. There are no changes in formulation.**

\*Based on US dollar sales through IQVIA reporting channels over a two-year period ending September 2023.

DEPLIN is a medical food for use only under medical supervision for the clinical dietary management of depression and schizophrenia and is specially formulated to meet the distinctive nutritional requirement for these condition.
